Summary Statement

Experienced React.js and front-end Software Developer with additional familiarity in back-end software languages. Success has been built by working closely with stakeholders, management and team to develop enhancements and resolve defects, increase visibility into company data through web-based interfaces, and work closely with teammates to accurately prioritize work through each program iteration.

Skills

- **Daily Usage:** HTML, CSS, JavaScript, React.js, SQL, REST API.
- **Familiar With:** GIT, node.js, NPM.

Work Experience

Software Developer

EBSCO Industries, Ipswich, MA

March 2020–Present

- Actively creating, enhancing and refactoring internal tools to improve the day to day for employees, while giving deeper and more relevant insight into customer data
- Collaborate with the team to plan and identify needs for planned work. Execute and implement code based on iteration work following Agile principles
- Efficiently and effectively communicate with stakeholders to provide the MVP within the time specified. Identify enhancements and potential issues prior/during work and prioritize tasks for completion
- Work collaboratively and openly with team members to creatively solve problems, and provide valuable assistance to others
- Provide ongoing maintenance, support and enhancements in existing systems and platforms
- Collaborate with team members to solve complex problems and identify future solutions and utilities
- Participate in regularly scheduled stand-ups and retro's to give team members insight into current work and assist others in their work

Account Executive

EBSCO Industries, Ipswich, MA

Nov 2013 - March 2020

- Research and identify customers with ideal fit to products. Educate and work closely with clients to implement and build brand awareness and recognition
